ShiftLoop — hub shift-handover app

## 1 · Summary

| 22 | 8 | 20+ | 13 |
|---|---|---|---|
| colour tokens × light/dark | type styles (Inter) | components & variants | hi-fi screens (+13 dark) |

The Task 2 wireframes are converted into a consistent, accessible visual design. The brand pairs a deep navy (trust, night shift) with a warm gold accent (attention, completion) — gold is used for progress, active states and the primary quick action, never for small text on white.

## 2 · Part A — Design system foundations

Atomic structure: **tokens** (colour, type, spacing, radius, elevation) → **atoms** (button, chip, input, icon) → **molecules** (list row, KPI card, search bar) → **organisms** (shift card, handover section, bottom nav) → **templates/screens**. Machine-readable tokens: `design-system/design-tokens.json`.

# 3 · Parts B & C — Typography and colour guides

## Type scale — Inter (primary) · system UI (fallback)

| Style | Font | Size / line | Use |
|---|---|---|---|
| Display | Inter 800 | 36px / 44px | Splash / onboarding hero |
| Headline | Inter 800 | 28px / 36px | Screen hero titles |
| Title L | Inter 700 | 20px / 28px | App bar, persona names |
| Title M | Inter 600 | 16px / 24px | Card & section titles, buttons |
| Body L | Inter 400 | 16px / 24px | Form values, paragraphs |
| Body M | Inter 400 | 14px / 20px | List rows, menu items |
| Label | Inter 600 | 12px / 16px | Field labels, chips, eyebrows (caps +6%) |
| Caption | Inter 400 | 12px / 16px | Helper / timestamps (min size) |

One family keeps rendering consistent on low-end Android; weight (400/600/700/800) creates hierarchy. Minimum text 12 px; line-height 1.33–1.5.

## 4 · Part D — Layout & grid

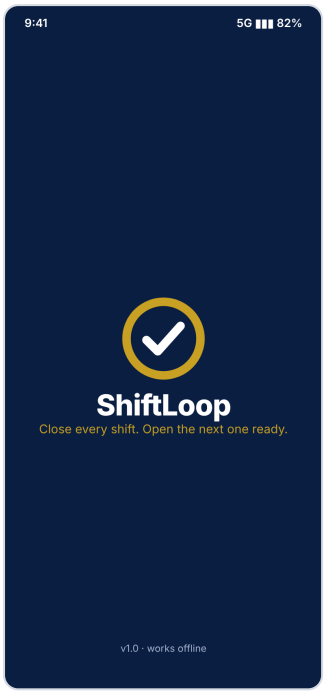

| Breakpoint | Grid | Navigation | Example |
|---|---|---|---|
| Mobile 360–599 | 4 columns · 16 margin · 16 gutter | Bottom navigation (5 tabs) | All 13 screens at 390 × 844 |
| Tablet 600–1199 | 8 columns · 24 margin · 16 gutter | Bottom nav, 2-column content | Dashboard 834 × 1194 |
| Desktop ≥ 1200 | 12 columns · 32 margin · 24 gutter · max 1280 | Side rail + 2/3 + 1/3 content | Dashboard 1440 × 900 |

Spacing follows a 4-pt base / 8-pt rhythm (4, 8, 12, 16, 24, 32, 48). Cards use 16 px padding; screens use 16 px margins on mobile.

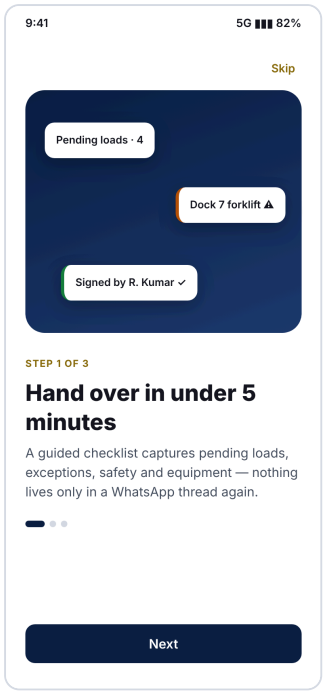

## 5 · Part E — Component library

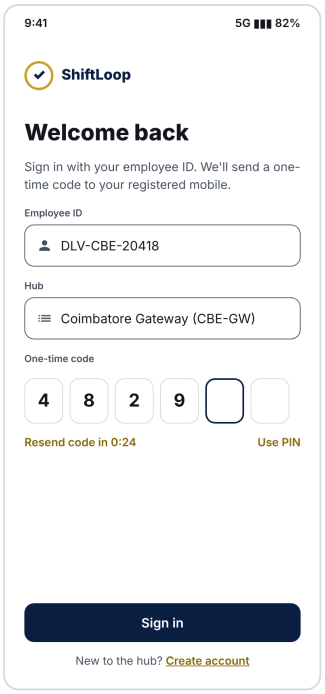

# 6 · Part G — High-fidelity screens (1/2)

*Onboarding*

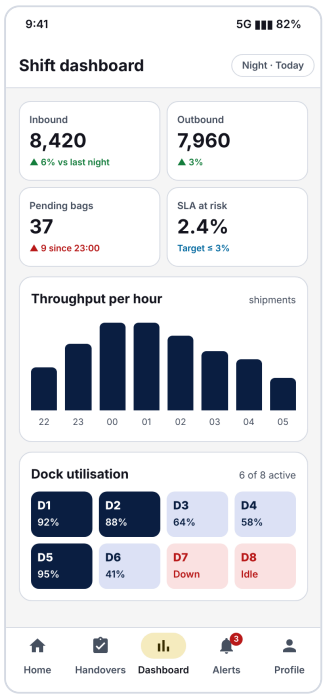

*Login*

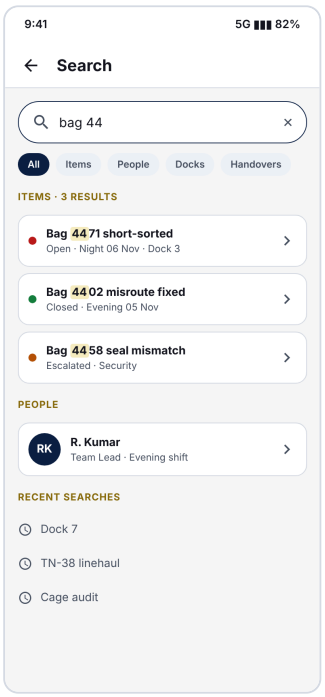

*Registration*

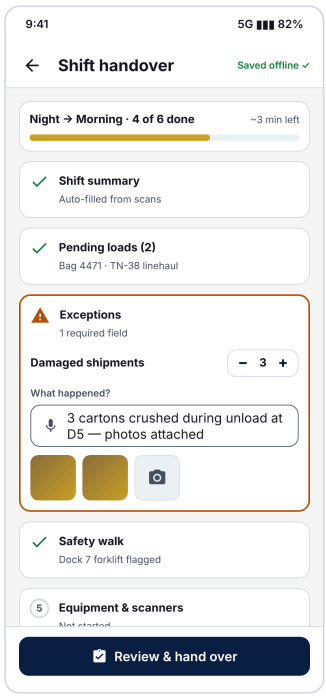

*Home*

*Dashboard*

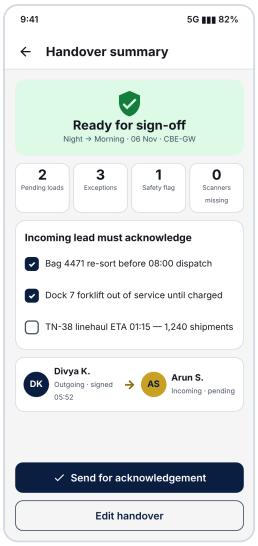

*Search*

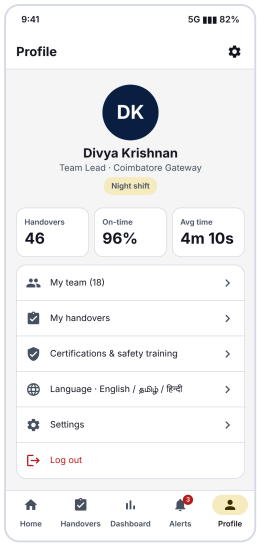

*Handover (main feature)*

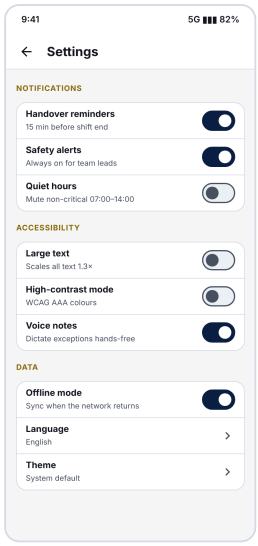

# 6 · High-fidelity screens (2/2) & dark mode

## Dark theme (same components, dark tokens)

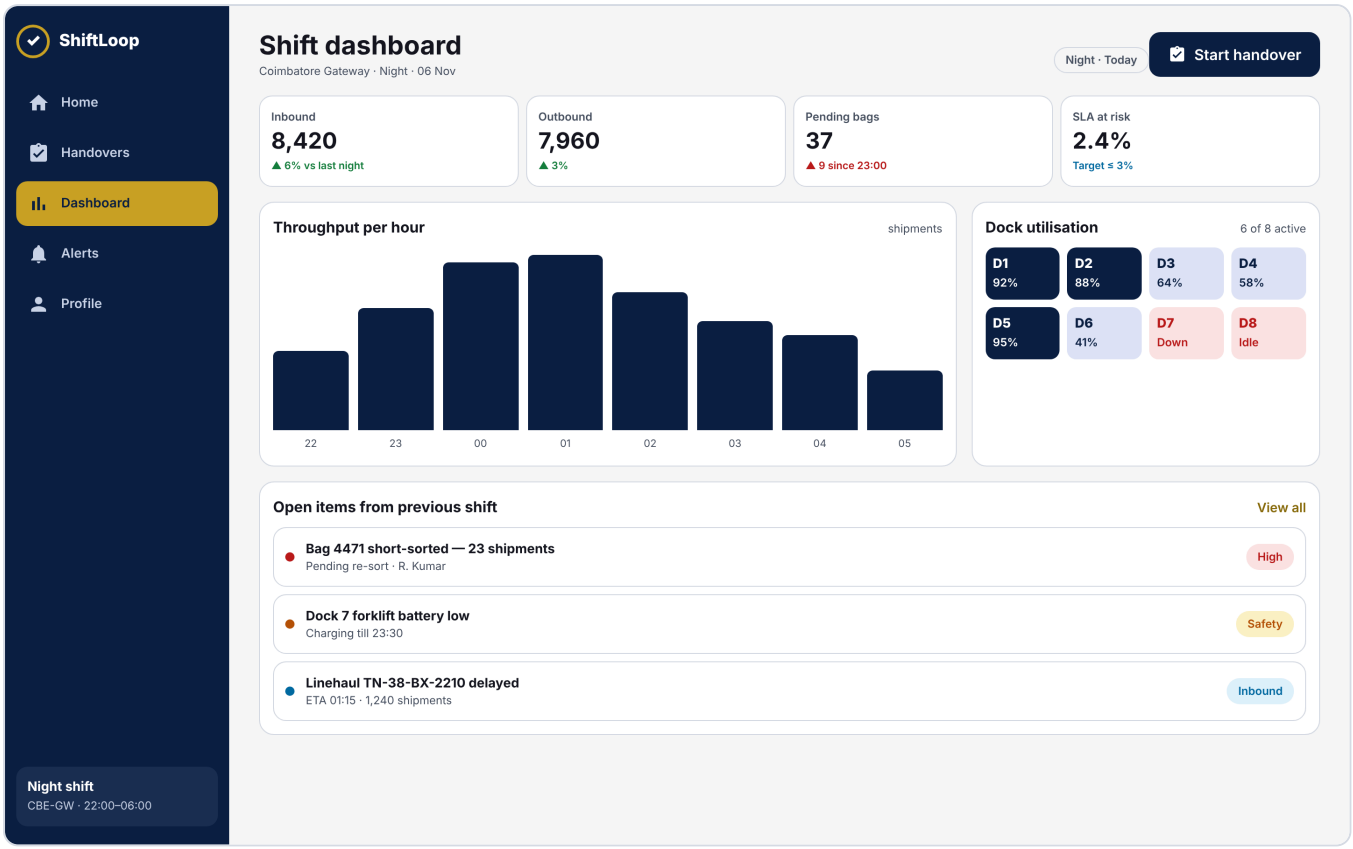

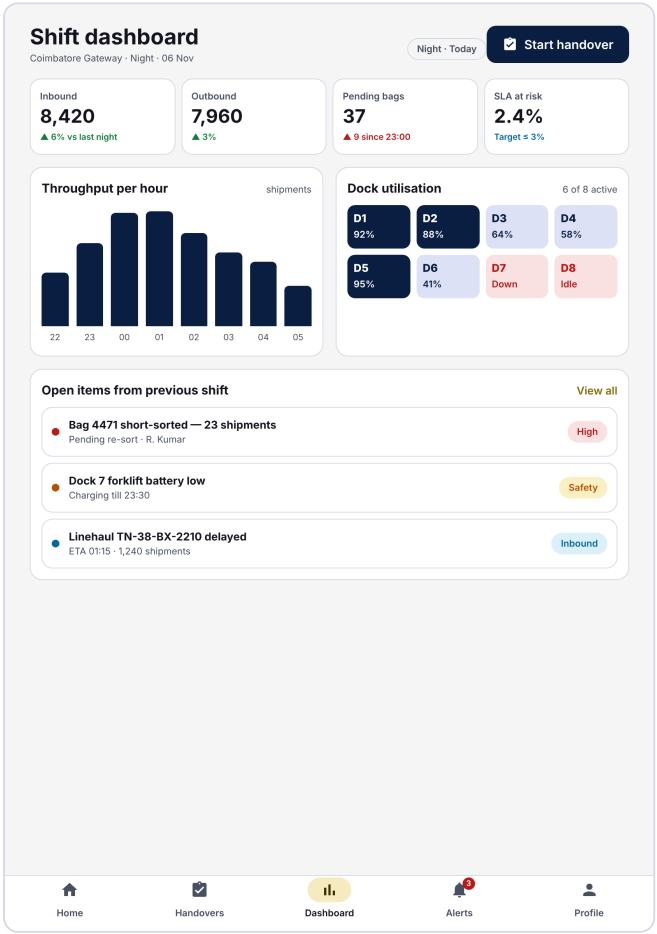

# 7 · Part H — Responsive design

| Element | Mobile | Tablet | Desktop |
|---|---|---|---|
| Navigation | Bottom nav | Bottom nav | Side rail with shift card |
| KPIs | 2 × 2 | 4 × 1 | 4 × 1 |
| Charts | Stacked | Side by side | 2/3 + 1/3 |
| Primary action | Home quick action | Header button | Header button |
| Lists | Full width | Full width | Card below charts |

Behaviour: KPI grid reflows by available columns; charts keep a minimum 180 px height; touch targets stay 48 px on every breakpoint; the bottom nav becomes a side rail at ≥ 1200 px.

### Findings & fixes

| Issue | Guideline | Resolution |
|---|---|---|
| Gold #C9A227 as text on white | 2.3:1 — fails AA | Gold is decorative only (rings, progress, active pill). Text links use accent-strong #8A6D0B (5.0:1). |
| 10–11 px micro-labels (summary grid, timestamps) | Below 12 px minimum in our type scale | Raise to Caption 12/16 in the next iteration; already 12 px in the component library. |
| Status shown by colour dots | Colour-only meaning (WCAG 1.4.1) | Every dot is paired with a text chip (High / Safety / Inbound / Done). |
| Icon-only buttons | Need accessible names | aria-label on back / search / settings buttons; icons are aria-hidden. |
| Touch targets | ≥ 48 × 48 dp (Material), ≥ 44 pt (Apple) | Buttons 48, icon buttons 48, list rows ≥ 56–64, inputs 52, OTP boxes 48 × 56 — all pass. |
| Dynamic type | Text must scale to 200% | Settings ▸ Large text (1.3×) and layouts use wrapping, no fixed heights on text containers. |
| Motion & time limits | Handover must not time out | Auto-save offline every change; no timeouts on forms. |
| Language | Tamil / Hindi / English users | Language switch in Profile; voice notes for low-literacy users. |

## 9 · Developer handoff & next steps

- Tokens: `design-tokens.json` (colour light/dark, type, spacing, radius, elevation, grid)
- Screens: `hifi-screens/*.png` (2×) + live HTML in `prototype-html/` (open `index.html`)
- Assets: icons are 24 × 24 SVG paths in `uiux_screens.py`; export as SVG for Android VectorDrawables
- Figma: import PNGs/HTML into the team file and publish the library; add the share link to README

**Task 4:** interactive prototype, micro-interactions, usability testing with 5 leads and heuristic evaluation.
